

Are you 65 or older?

If so, you are at a higher risk group for getting pneumococcal disease.

**The pneumococcal vaccine is
safe, effective and covered by OHIP.**

Pneumococcal disease is a bacterial disease that can cause serious infections:

Meningitis (brain infection)

Pneumonia (lung infection)

Bacteremia (bloodstream infection)

**A safe and effective
vaccine is available.**

Ask your physician or nurse about the pneumococcal vaccine.
